Summary

Passionate Full Stack Developer with 3 years of experience in building and maintaining high-performance web applications. Skilled in React, Next.js for frontend, and Node.js, Express, PostgreSQL for backend. Proven success in Agile environments, delivering user-friendly solutions and eager to contribute to dynamic development teams.

Work Experience

HugeLeap , *Full Stack Developer* | *Goa* Oct 2023 - Present

- Optimized Next.js apps with code splitting and virtual DOM techniques for enhanced performance.
- Integrated external APIs to fetch data from remote servers and improve application functionality.
- Developed React components with ES6, Context API, and Webpack for a scalable e-commerce site.
- Utilized JavaScript libraries (D3.js, Bootstrap) to design and implement user interfaces per client specs.
- Led backend team in Node.js for API development and Postgres database management.
- Directed team activities, managed PR reviews, and oversaw feature releases and application maintenance

Persistent Systems Ltd., *Software Engineer* | *Goa*

IBM Product Engineering | Jan 2023 - Sept 2023

- Developed and maintained tool to automate porting process, using Python and React.
- Led the migration of UI from halfmoon UI framework to carbon design system. Translated intricate wireframes and designs into high quality React code using Carbon framework, seamlessly integrating with the tool.
- Contributed to the development of backend services and APIs using Node Js.
- Proactively implemented new features and enhancements to meet evolving client requirements within an agile project structure, collaborating closely with a small team of 4 members.
- Implemented comprehensive unit tests and API tests, significantly reducing bugs, and elevating overall code quality to ensure a reliable and efficient application.

UI Development | Aug 2021 - Dec 2022

- UI development as per the shared UX design.
- Integration of backend API with developed UI.
- Implementing mockup APIs for testing UI functionalities.
- Testing application for end-to-end functionality.
- Worked on UI code-peer review and PR reviews
